

You can fit this into your schedule

**Make a preventive care
appointment with your PPO
dentist (it's 100% covered)**

Visiting the dentist regularly means oral health issues will be addressed before they become more severe.

Your preventive care visits are covered 100% with a PPO provider. Visiting the dentist for exams and cleanings can help save money (and hassle) on more extensive work down the road.

A dental cleaning will help:

- Prevent cavities
- Stop tooth loss
- Brighten your smile
- Freshen your breath
- Boost your overall health
- Save you money
